## Summary

In my progressive career of 35+ years, I have attained proven success and presently I am working with Najran University, Najran, Saudi Arabia as Associate Professor. Over the years, I have acquired proven skills in designing long term academic plans; extensive exposure in preparing daily lessons & long-term teaching programs in accordance with board guidelines by using a variety of methods.

### SKILLS SET

- Identifying, selecting, implementing and modifying programs & resources to meet the needs of the students with varying backgrounds, learning styles, and special needs and augmenting meaningful learning experiences while achieving goals
- Teaching Gross Anatomy, Embryology, Neuro-anatomy to medical and Allied Medical science students, as well as dental, radiology, physiotherapy, laboratory and nursing students Respiratory Therapy, Pre MED and Pre AMS: Gross Anatomy and embryology along with it delivering full support in teaching, research and administration
- Developing and ensuring that academic policies effectively support the goals of the University and, as necessary, recommending changes in academic policy and programs and instructional leadership, while communicating a core vision towards driving results for academic achievement

Throughout my career, I have attained proven success in providing an educational atmosphere where students have the opportunity to fulfill their potential for emotional, physical and psychological growth. I possess management skills, the ability to multitask, good understanding of operational & systemic aspects for providing complete solutions, seeking & harnessing new opportunities and creating win-wins.

In addition, I have also attained the ability to think strategically, analyze, and articulate solutions to complex problems, coupled with the ability to organize information and communicate the same in a clear and useful manner. I am an effective team-player, with the skills to cut across cultural barriers in any business scenario.
